### PROJECT PROFILE ON

Cable T.V. Network/ Computer Centre

### PROJECT INTRODUCTION

A cybercafe is a type of business where computers are provided for accessing the internet, playing games, chatting with friends or doing other computer-related tasks. In most cases, access to the computer and internet is charged based on time. There are many internet cafes located worldwide, and in some countries they are considered the primary form of internet access for people. Technology education classes can be classified as a computer training center, though public libraries, educational institutions and some job training resource centers typically have computer labs and offer basic computer skills and software training as well.
